

**CLAIM AMENDMENTS**

Please amend the claims as follows in accordance with the Revised Format of Amendments under 37 C.F.R. § 1.121.

1 1. (Currently amended) ~~In a unitary business machine with a top, bottom, front, back~~  
2 ~~and two sides, a~~ A customized form output apparatus, the apparatus comprising:

- 3 a) electronic data storage in a unitary business machine with a top,  
4 bottom, front, back and two sides, for storing preselected customized  
5 forms;  
6 b) a display on said unitary business machine connected to the data  
7 storage for displaying stored forms;  
8 c) a selector on said unitary business machine connected to the data  
9 storage for selecting forms from the display; and  
10 d) an integral hard copy printer in said unitary business machine  
11 connected to the data storage for printing a hard copy of said forms as  
12 selected.

1 2. (Original) The apparatus of claim 1 further comprising a wall mount connected to  
2 the back for mounting the apparatus on a wall.

1 3. (Original) The apparatus of claim 1 wherein said data storage is a hard drive  
2 conformed to receive electronic input for new customized forms and to store  
3 input forms.

1 4. (Original) The apparatus of claim 1 wherein said display is a flat panel display.

1 5. (Original) The apparatus of claim 1 wherein said selector is a touch screen  
2 overlaying said display.

1 6. (Original) The apparatus of claim 1 further comprising a battery for providing power  
2 for operation.

1 7. (Original) The apparatus of claim 1 wherein said selector further comprises user  
2 selections from a group including select, print, and cancel.

1 8.(Original) The apparatus of claim 1 further comprising a paper holder connected to  
2 said integral printer and to the back of the apparatus.

1 9.(Original) The apparatus of claim 1 wherein said hard copy of a selected form is  
2 dispensed from the bottom of the apparatus and paper for printing is input at  
3 the top of the apparatus.

1 10.(Currently amended) A wall mounted print on demand form kiosk comprising:  
2 a) a unitary box with a top, bottom, front, back, and two sides;  
3 b) an electronic data storage means for storing customized forms in  
4 electronic form ~~connected to~~ located within said unitary box;  
5 c) a flat panel display means connected to said data storage means for  
6 displaying stored forms;  
7 d) a touch screen selection means connected to said data storage means  
8 overlaying said flat panel display means for selecting forms from the  
9 display means;  
10 e) an integral hard copy printer means connected to the data storage  
11 means for printing a hard copy of a form as selected by a user; and  
12 f) a power source connected to the unitary box.

1 11 (Currently amended). The kiosk of claim 10 wherein the unitary box is conformed  
2 in size to approximately match the length and width of a sheet of letter sized or  
3 legal sized paper.

1 12.(Currently amended) The kiosk of claim 10 further comprising a paper holder  
2 connected to the printer means at the back of the unitary box.

1 13.(Currently amended) The kiosk of claim 10 wherein hard copies of selected forms  
2 are dispensed from the bottom of the unitary box and paper for printing is input  
3 at the top of the unitary box.

1 14.(Original) The kiosk of claim 10 wherein said box is conformed to hold fifty to one  
2 hundred sheets of paper for printing.

1 15.(Original) The kiosk of claim 10 wherein said power source is a battery.

1 16.(Original) The kiosk of claim 10 wherein said data storage means is a hard drive  
2 conformed to receive electronic input for new customized forms and to store  
3 input forms.

1 17.(Currently amended) A method of providing customized printed forms from a wall  
2 mounted print on demand form kiosk comprising the steps of:

3 a) constructing a unitary box with a top, bottom, front, back and two sides;

4 b) connecting a hard drive to within said unitary box for storing electronic  
5 copies of customized forms;

6 c) connecting a flat panel display on said unitary box and to said hard  
7 drive for displaying stored forms;

8 d) connecting a touch screen selector to said hard drive and overlaying  
9 said flat panel display for selecting forms from the display;

10 e) connecting a hard copy printer within said unitary box and to said hard  
11 drive for printing a hard copy of a form as selected by a user;

12 f) connecting a power source to said unitary box;

13 g) loading customized forms on said hard drive;

14 h) selecting a form to be printed; and

15 i) printing said form.

1 18.(Original) The method of claim 17 further comprising the step of conforming the  
2 box to the approximate size of the length and width of a sheet of letter sized or  
3 legal sized paper.

1 19.(Currently amended) The method of claim 17 further comprising attaching a paper  
2 holder to the back of the unitary box.

1 20.(Currently amended) The method of claim 17 further comprising the step of  
2 constructing the unitary box so that hard copies of selected forms are  
3 dispensed from the bottom of the box and paper for printing is input at the top  
4 of the unitary box.
